SEAN@SL20XX.COM

224-650-1919

SL20XX is my creative alias—which stands for my initials and a placeholder for the current year. As a designer and developer I've worked in many different mediums—Print & Digital Design, Web & Application Design, Responsive Web Development, AR/VR, 2D/3D Motion Graphics & Animation, Illustration, and Photography.

The core of my passion is in **purpose & interaction**. My goal with what I create is to balance visual appearance with experience and perception—creating a conscious design. Growing up, I wanted to be an Architect. I'm very inspired by nature and fashion, and am interested in many different fields of functional and visual design—both digital and beyond the screen. I love exploring brutalism, as well as experimental thought and design practices.
